F27 Workflow
Decommissioning & Weekly Workflow

1.0 Purpose and Overview

The REM Tracker primarily serves to view and manage CVX's AR remediation project, including the status of REMs and their site-specific Assets. Secondary functions include reclamation site tracking to bond release.

1.1 Overview

1. Projects are organized by ECMC issued REMs
2. For each REM, Assets (wellhead, flowline(s), tank battery, spill/release, PBV, etc.) are identified and tracked
3. Processes tracked and logged in the REM Tracker include:
    - Decommissioning results
    - Investigation and Remediation results
    - F27 Submittals and attachments
    - Work performed, proposed, and/or planned
    - ECMC Conditions of Approval (COAs) and Comments
    - Asset/REM consolidation or transfer
    - Reclamation sites released for full reclamation (following remediation closure) or interim reclamation (following decommissioning)
4. Remediation status tracking includes historical logging of:
    - REM Closure status (aggregated from individual asset closure statuses)
    - Asset Closure status
    - Asset Decontamination Status
    - Asset Contamination Status
    - Asset Remediation & Monitoring Status
    - Assignment/reassignment (consolidation) of assets and REMs
5. Holds Delays (REM) currently tracked include:

Summit OOHs	Landowner Access	Crops	Excavation
CVX Legal	Timeline Updates	Wildlife	Drill Rig
CVX Technical	Permitting		Permitting

6. Special and Priority Categories are added and tracked and currently include:

Active Operations	Millage Brothers Properties	Bishop 1.5m REMs	

Operational Users targeted by the REM Tracker include:

- Remediation Business Partners
- CVX Remediation Team
- CVX Land Team
- CVX Reclamation Team
- CVX Brownfields Team
- CVX Rem Tracker Admin

1.2 Categories & Statuses

The following REM and Asset Closure statuses are implemented:

Non Flowline Decommissioning Status

(Wellheads, Tank Battery, PBV, AST, etc.)

Decommissioning Options	Explanation
Work Not Started	F27I approved, work not started
Decommissioned	WH, TB, PBV, Decommissioned

Flowline Decommissioning Status

FL Decommissioning Options	Explanation
Work Not Started	F27I approved, work not started
Previous ABIP	FL Abandoned prior to this REM
ABIP	FL Full ABIP. May or may not return
ABIP - Final	FL Final ABIP. Will not return
Partial ABIP	FL Partial ABIP, partial removed
Temp ABIP	FL 'Pull later 'or other 'temp' info
Removed	FL Fully removed
Spill / Release _ NA	Decommissioning info not needed
Needs Update	Temporary Status

Asset Remediation & Monitoring Status

Applicable To:

Soil Excavation	GW Monitoring
Soil Remediation	GW Remediation

Status Options	Explanation
Work Not Started	Work not started
Not needed	Sampled, not needed
Planned / Proposed	Sampled, system needed, planned/proposed
Installing	Sampled, system needed, installing
Active	Active system/process
Completed	Historical, now clean
Nneeds update	Temporary Status

REM Closure Status Options

REM Closure Options	Explanation
Work Not Started	Work not started
Active	Work started
Closure Ready	All Assets ready for closure
Closure Requested	Requested to ECMC
Closure Approved	ECMC Approved
Closure Denied	ECMC Denied
Administrative Closure Requested	Request to move Assets, close REM
Administrative Closure Approved	REM/Asset transfer approved
Administrative Closure Denied	REM/Asset transfer denied
Archived	Removed from REM Tracking
Needs Update	Temporary Status

Asset Closure Status Options

Asset Closure Options	Explanation
Work Not Started	Work not started
Active	Work started
Closure Ready	Asset Compliance Points met
Needs Update	Temporary Status

Asset Contamination Status

Applicable To:

Soil SSR > 915	Groundwater Inorganics > 915
Soil Organics > 915	Groundwater Organics > 915
Soil Metals > 915	

Status Options	Matrix	Explanation
Work Not Started	Soil/GW	Work not started
GW Not Encountered	GW only	Work started, GW not encountered
None	Soil/GW	Sampled, contamination not found
Current	Soil/GW	Contamination present, not resolved
Historical	Soil/GW	Historical contamination, now resolved
Needs Update	Soil/GW	Temporary Status

2.0 REM Tracker Layout and Basic Features

The REM Tracker provides various user and navigation features:

- Navigation links to top level pages
- Cookie crumb links — Located top left. Provides quick links to parent pages
- Export — Exports the filtered/unfiltered records currently displayed
- Filter — Filter on multiple criteria for the columns on the page
- Search — Efficient tool for searching all columns and rows
- Sort — Sort by any column
- Column resize — When enabled, drag the column header cell to expand/contract the column width (not enabled for all columns)
- Drop down selector for choosing how many records to display in the grid
- Horizontal and vertical scroll bars
- Page navigation forward/back arrows

2.1 Top Navigation and Pages Overview

The top navigation provides links to the main entry pages and views. While subject to change, the top navigation and main pages currently include:

1. REMs & Assets dropdown
    - REM Workflow: Main entry page for business partners to enter REM information
    - REM Overview: Overview page without links to ongoing work and status logging
    - Closed REMs: REMs that are closed, administratively closed, or archived
2. Misc dropdown
    - Priority page for adding/removing priority categories (for CVX use)
    - Special Category page for adding/removing special categories (for CVX use)
3. Info Drop down
    - Information page provides instructions, guidance, and lists for implementing the REM Tracker
    - Updates page lists the recent changes to the REM Tracker use
4. Profile and Account Settings allows for updating:
    - User password reset
    - User email and group email
    - Username and company

2.2 Adding and Editing Data

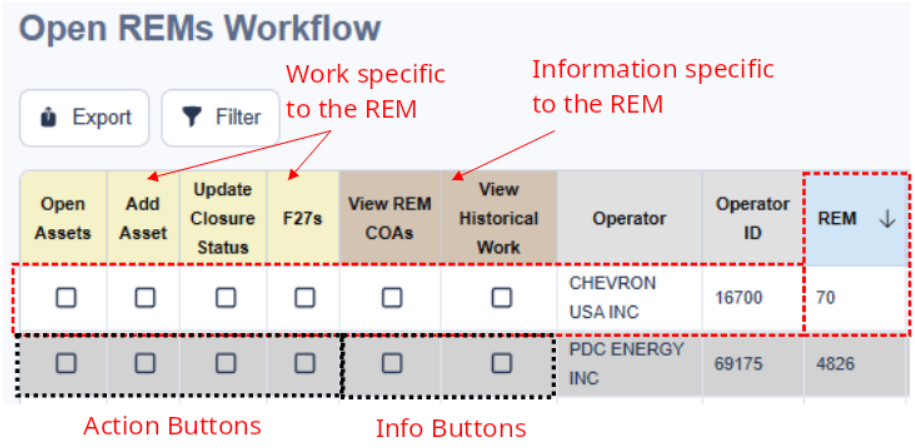
Data is added via forms opened from a REM, Asset or F27 Records. Editing is performed using forms or in some instances via editing directly in the table/grid (inline editing). Data fields/columns that allow inline editing are suffixed with (e).

2.3 Workflow and Information Hierarchy

The REM Tracker is designed hierarchically so that context is maintained for data entry and information drill down. For example, information and actions for a REM are accessed from the record/line for that REM. This concept is key to the REM Tracker and extends/cascades to Assets, F27s, Status, Work Logs, COAs, etc.

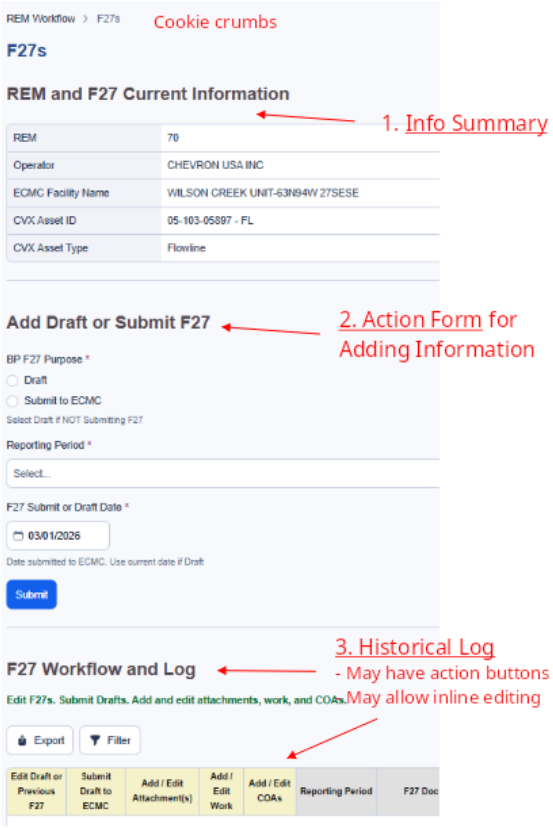
Action Buttons are used to open other pages / forms for various data entry purposes.

Info Buttons open detail pages specific to that REM



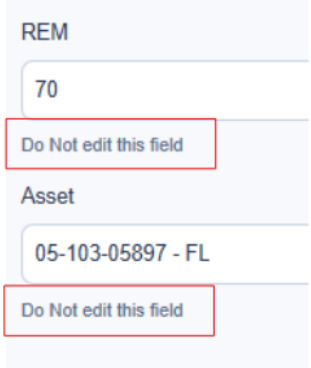
2.4 Page Structures

The detailed workflow pages are frequently sectioned into information, form action, and historical log sections. The historical log may have additional action or info buttons and may or may not have inline editing enabled



2.5 Non-Editable Form Data Fields

Forms may have data fields that users should not edit in any way. They are commented to alert users.



3.0 Main Workflow Pages and Features

3.1 Open REMs Workflow Grid

The Open REMs Workflow grid is the main entry point for BPs entering and editing REM information. The grid includes:

1. Action Buttons
2. Information/Log Buttons
3. Calculated Fields
4. Inline Editing
5. View only information
6. Information updated weekly by Admin

1. Action buttons are mostly located in the left columns and direct to another page to perform important updates and to view detailed information. Their actions include:

- Open and view Assets associated with the REM
- Add an Asset to the REM
- Update the REM closure status
- Enter and view F27s for the REM
- View the REM's Historical work
- View the REM's COAs and ECMC comments

2. Information on the Open REM grid that is updated via Action Buttons includes:

• REM Closure Status • Last Closure Status Date	• CVX Asset Type • CVX Asset ID	• Recent F27 Doc • Recent F27 Submit Date • Recent F27 Status

3. Users add and update F27s via the action buttons and subsequent pages. REM Tracker Admin updates the ECMC F27 review status weekly (Recent F27 Review Status and Review Date). After each of these events, the following calculated fields are updated, as appropriate:

• Next F27 Due Date • Days to Next F27 Due	• Recent F27 Compliance Status	• F27 Compliant

4. Fields where inline editing is enabled are marked (e):

• ECMC Site Name • ECMC Facility ID/API • ECMC Facility Type • Comment • Initial F27 Doc ID • Initial F27 Submit Date	• CVX Manager • Reporting Consultant • Reporting Schedule • Landowner • Landowner Parcel • EPS	• Hold Delays • Special Categories • Priority Categories • CVX LOD • ECMC Location ID • BP Company

• Needs Update • Needs Update Comment	• Comment • Closure F27 Doc	• Depth to GW • Closure F27 Date

5. View Only information includes:

• Operator	• Operator ID • ACTS ID	• REM Number

6. Information updated weekly by Admin includes:

• New REMs and ECMC Info	• CVX Asset Type and ID for assets for new REMS	• Recent F27 Review Status • Recent R27 Review Date

3.2 Asset Page/View/Grid

The Asset grid opens from the REM grid, displays all the assets associated with a REM and includes:

1. Action Buttons
2. Fields updated via action buttons
3. Inline Editing
4. Calculated fields
5. View only information

1. Action buttons are mostly located in the left columns and direct to another page to perform important updates and to view related information. Their actions include:

- Enter or update Decommissioning investigation results, including related to reportable releases
- Update Asset Closure status
- Update Asset Contamination statuses:
  - Soil Organics > 915
  - Soil Metals > 915
  - Soil SSR > 915
  - Groundwater Organics > 915
  - Groundwater Inorganics > 915
- Update Asset Remediation & Monitoring statuses
  - Soil Excavation
  - Soil Remediation
  - GW Monitoring
  - GW Remediation
- Transfer the asset to another REM (action button located at the grid's right end)

2. Information that is updated via Action Buttons includes:

• Asset Closure Status • Asset Closure Status Date	• Asset Decom status • Asset Decom date	• Soil organics status • Soil metals and SSR status

• Soil Remediation status • Soil Excavation status • GW Monitoring Status	• Decom Had Reportable • Reportable Via • GW Remediation Status	• GW organics status • GW inorganics status • Status update dates

3. Fields where inline editing is enabled are marked (e) and include:

• Comment • Needs Update • Needs Update Comment • Initial F19 Doc	• CVX Asset Type • Release Location • Release Sample ID • ACTS ID	• Asset Report/Work Sharing • Depth Release Impact • Depth to GW • Geology

4. The following fields are calculated:

• CVX Asset IT		

5. View Only information includes:

• CVX Asset ID	• ECMC Site Name • ECMC Facility Type	• ECMC Facility API/ID • REM Number

4.0 When to Update the REM Tracker

The REM Tracker is to be updated weekly by Business Partners and following asset decommissioning and F27 submittals, and as needed.

1. Weekly
2. Following Decommissioning
3. F27 Scheduled Reports
4. Following F19 Approval
5. Following receipt of Laboratory Reports
6. Other Updates

1. **Weekly**
   a. Upload reviewed F27-S
      - Add COAs/Comments for recent F27s
   b. If F27 requested closure and was approved:
      - Verify F27 status has been updated in F27 log
      - Update REM Closure status
   c. If F27 requested REM consolidation
      - Transfer asset(s) to new REM using Asset REM Assignment form
      - Update REM Closure status
2. **Following Decommissioning**

a. Review Initial F27 and ensure all assets from Initial Action Summary are present in the REM Tracker and associated with the REM. Update as needed.
b. Add decommissioning information: FLR collected, Had Reportable, Reportable via
c. Submit F19/Reportable information as needed
d. Update Asset contamination, Remediation & monitoring, and closure status as appropriate
e. Update REM closure status

3. **F27 Scheduled Reports**
   a. If spill F19 is recently approved, add Spill asset to REM Tracker as needed
   b. Add F27 information (Document ID, Submittal/Draft Date)
   c. Add/upload attachments and associate them with assets
   d. Add F27 reported/performed work and associate with attachments and assets
   e. Add F27 proposed work and associate with attachments and assets
   f. Add 90 or 180 Day planned work (optional)
4. **Following ECMC F27 or F19 Approval**
   f. Upload reviewed F27
   g. Add COAs/Comments from reviewed F27 if any
   h. Add Spill asset (Spill ID) following F19 approval
5. **Following receipt of Laboratory Reports**: Update decommissioning results and status, as appropriate
6. **Other Updates.** Changes to Hold Delays, Special Categories, REM assignment/consolidation, Reporting Consultant, Asset BP, or any change in contamination, remediation/monitoring, or closure status

5.0 Tasks

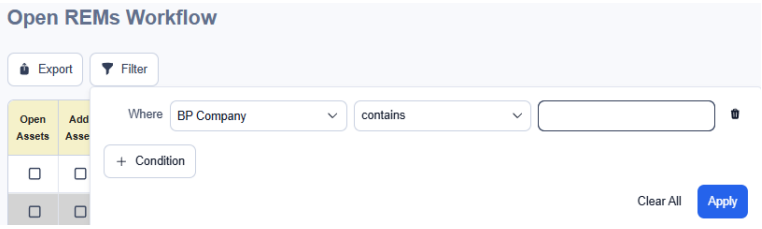
5.1 QA Process

Following data addition or edit, users should verify accurate updates by visual QA of the following, as appropriate:

- Info Summary section on the data entry page
- Detailed log (F27 Log, Work Log, Status Log, etc.) on the data entry page
- The parent table grid. For example after adding an asset, verify on the Open REMS Workflow grid that the asset has been added to the CVX Asset Type and CVX Asset ID data fields

5.2 Filtering Views for BP

Using the page filter, select BP Company and enter the company name. Apply the filter.



5.3 REM - Adding Asset to REM

For the REM (record) to which you want to add an Asset:

1. Click 'Add Asset' button
2. Enter information exactly from the F27 in 'Add a new Asset' section.
3. Utilize Information Action Summary to interpret the appropriate CVX Asset Type
4. After Submit, verify the REM table grid updates with the new Asset

CVX Asset Type	CVX Asset ID
Flowline	05-103-05897 - FL
Tank Battery	306719 - TB
Flowline Tank Battery Well	05-123-13139 - FL 05-123-13139 - WH 323514 - TB

5.4 REM - Updating REM Closure Status

For the REM (record) for which you want to update the status:

1. Click 'Update Closure Status' button
2. Enter the updated REM Closure Status and date of change
3. After Submit, verify the REM table grid updates with the new REM Closure Status and Date

REM ↓	REM Closure Status	Last Closure Status Date
70	Active	02/03/2026

5.5 F27 - Creating / Adding F27

For the REM (record) to which you want to add an F27:

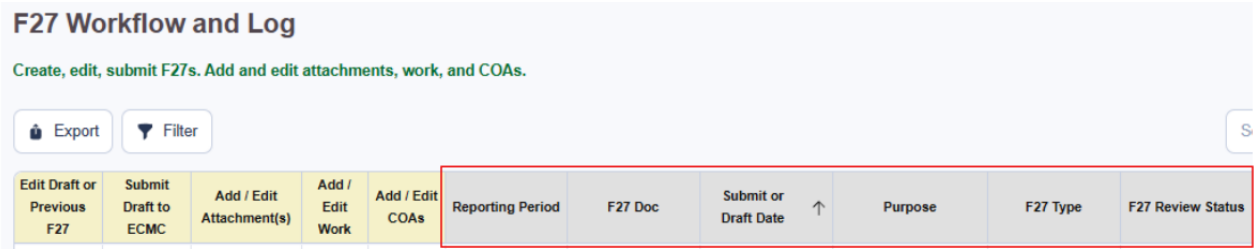
1. Click 'F27s' button
2. Verify Recent F27 Doc and status in the 'REM and F27 Current Information' section
3. Enter information in 'Add Draft or Submit F27' section
   a. Select Draft if the F27 is not being submitted
   b. Select 'Submit to ECMC' if the F27 has or will immediately be submitted
   c. Select appropriate Reporting Period and F27 Type.
   d. Enter F27 Document ID from ECMC Web Forms
   e. Correctly enter 'Is this F27 the Most Recent F27? If entering a previous F27, answer No
   f. Enter if the F27 requests Closure or Administrative Closure
   g. After Submit, verify the (1) 'REM and F27 Current Information' and (2) 'F27 Workflow and Log' update with the new F27
   h. Verify REM grid view updates accurately

When 'Is this F27 the Most Recent F27?' is selected Yes, the REM grid view is updated with this Document, Date, and the status is set to In Process. Draft F27 do not update the REM grid view.

REM and F27 Current Information

REM	70
Operator	CHEVRON USA INC
ECMC Facility Name	WILSON CREEK UNIT-63N94W 27SESE
CVX Asset ID	05-103-05897 - FL
CVX Asset Type	Flowline

Recent F27 Document ID	404153955
Recent F27 Status	IN PROCESS
Recent F27 Submit Date	04/04/2025



5.6 F27 - Editing Draft or Previous F27

1. In the F27 Workflow and Log, click the 'Edit Draft or Previous F27' button
2. Enter information as described in 5.5 above
3. Verify the F27 Workflow and Log section updates
4. If F27 is the Most Recent and is not Draft, verify REM grid view updates accurately

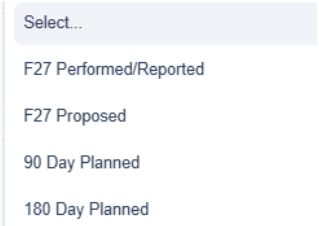
5.7 F27 – Submitting Draft

1. In the F27 Workflow and Log, click the 'Submit Draft to ECMC' button
2. Enter information as described in 5.5 above
3. Verify the Log and Current Information sections update, as appropriate
4. If F27 is the Most Recent, verify REM grid view updates accurately

5.8 F27 – Adding / Editing Attachments

1. Ensure attachments are available and, if possible, PDF file sizes have been reduced
2. In the F27 Workflow and Log, click the 'Add / Edit Attachments' button
3. Select the correct Attachment Type. If additional types are needed, contact Admin. When selecting 'Other', enter type in 'Description'.
4. If attaching Laboratory Report, ensure its ID is entered in Document / Lab Report ID
5. Attach file from PC
6. Select 'Assets' dropdown and click each Asset to which the Attachment applies.
7. Select the BP performing the attachment's work
8. DO NOT edit the F27 data field
9. Following Submit, verify the attachment is listed and accurate in the 'F27 Attachments' log
10. Edit information via the log table grid

5.9 F27 – Add / Edit Work



1. Ensure attachments have been added to the F27 as described in section 5.9
2. In the F27 Workflow and Log, click the 'Add / Edit Work' button
   F27 Performed/Reported Work

3. Highlight Work Category and select 'F27 Performed/Reported'.
4. From the 'Work Performed' dropdown, select the first work being logged.
5. From the 'Attachments' dropdown, select all the attachments related to the work
6. From the 'Asset work applies to' dropdown, select all the Assets which this work relates to
7. Select work date, or document date
8. DO NOT edit F27, REM, or Reporting Period data fields
9. After Submit, verify the Work accurately populates in the 'Historical Work, F27s, Attachments' log
10. To edit that or previous work, select the 'Edit Work and Attachment' button in the log grid
11. Repeat steps 5 through 10 with each F27 Performed/Reported' work activity the F27 reports

Edit Work and Attachment	Reporting Period	F27 Document	F27 Submit Date	F27 Review Status	Assets	Work Date (e)	Work Category (e)	Work Activity (e)
☐	2026	mmmm	02/24/2026	In Process	05-103-05897 - FL	02/24/2026	F27 Performed/Reported	SSI - O

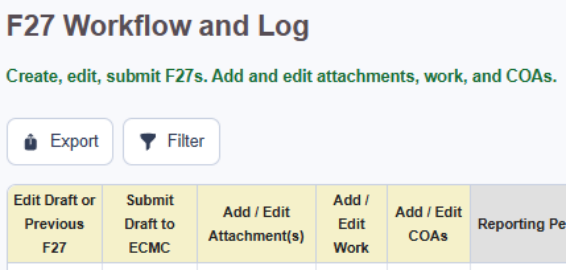
F27 Proposed Work

12. Select 'F27 Proposed' from 'Work Category' dropdown
13. From the 'Work Proposed Planned' dropdown, select each activity this F27 proposes. Note that multiple can be selected simultaneously
14. From the 'Attachments' dropdown, select all the attachments related to the work proposed
15. From the 'Asset work applies to' dropdown, select all the Assets which this work relates to
16. DO NOT edit F27, REM, or Reporting Period data fields
17. After Submit, verify the Work accurately populates in the 'Historical Work, F27s, Attachments' log
18. Edit information via the log table grid

90 Day and 180 Day Planned Work

19. Select either '90 Day Planned' or '180 Day Planned' work 'Work Category' dropdown
20. From the 'Work Proposed Planned' dropdown, select each activity planned. Note that multiple can be selected simultaneously
21. After Submit, verify the Work accurately populates in the 'Historical Work, F27s, Attachments' log
22. Edit information via the log table grid

5.10 F27 – Add / Edit COAs



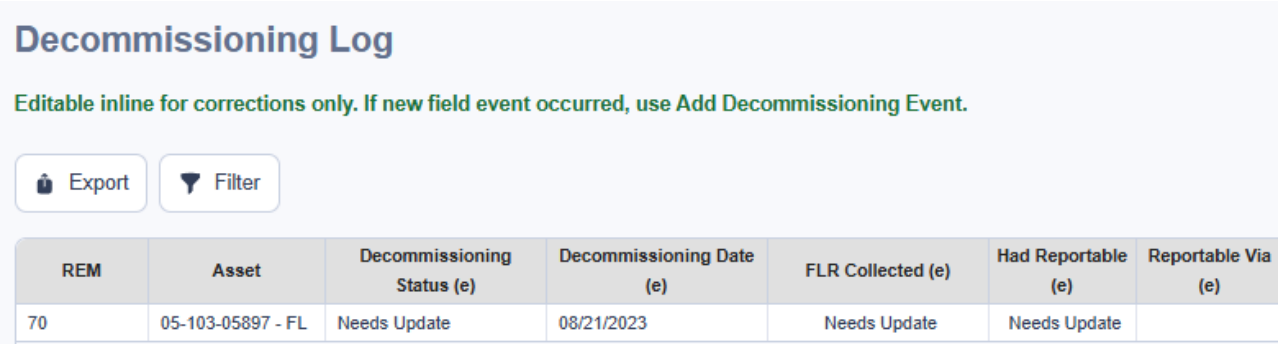
1. From 'F27 Workflow and Log' click the 'Add / Edit COAs button
2. Select either COA or Comment
3. If COA resolved, select Yes
4. Select EPS
5. If desired, Select a sequence number for the COA / Comment
6. Copy-Paste the ECMC COA/Comment into the 'COA / Comment' section
7. If desired, add BP Comment
8. After Submit, verify the COA/Comment accurately populate the COA Log

9. Edit the COA/Comment via inline editing in the COA Log table grid

5.11 Asset – Add / Edit Decommissioning Status

1. From the Open Assets table grid, click the 'Decom Status & Release' button for the specific Asset
2. Enter the decommissioning event information
   a. Decommissioning Date
   b. Decommissioning Status
   c. FLR Collected
   d. Form 44 Document # (as appropriate)
   e. Had Reportable?
   f. Is this the most recent Decommissioning event?
      Note: selecting Yes updates all Asset grid views with this information. Select No if entering information for previous decommissioning
   g. If 'Had Reportable' = yes, select the appropriate 'Reportable Via'
   h. Do Not edit REM or Asset data fields
   i. After Submit, verify information is accurately populated in the 'Decommissioning Log' grid view
   j. Event editing is performed via the 'Decommissioning Log' grid view

When 'Is this the most recent Decommissioning event?' is selected Asset grids are updated with this information. Select Yes only for the most recent decommissioning event.



REM	Asset	Decommissioning Status (e)	Decommissioning Date (e)	FLR Collected (e)	Had Reportable (e)	Reportable Via (e)
70	05-103-05897 - FL	Needs Update	08/21/2023	Needs Update	Needs Update	

5.12 Asset – Add Asset Closure Status

1. From the Open Assets table grid, click the 'Closure Status Update' button for the specific Asset
2. Select the latest closure status and the effective date
3. After Submit, verify the status updates accurately in the Open Assets table grid

REM ↓	Asset Closure Status	Last Closure Status Date
70	Active	02/04/2026

5.13 Asset – Update Contamination Status

1. From the Open Assets table grid, click the 'Cont. Status Update' button for the specific Asset

Soil Organics Status	Current
Soil SSR Status	Current
Soil Metals Status	Current
GW Organics Status	Current
GW Inorganics Status	Current

2. Visually verify the current contamination status in the 'Asset Information' section.
3. Select the Contamination Category, new Contamination Status, and Status Change Date
4. After Submit, verify both the 'Asset Information' and 'Contamination Log' sections update accurately
5. Repeat the update for all Categories that have changed
6. Once complete, navigate to the 'Open Assets' page and verify the status and effective date have updated accurately.

Soil Organics Exceedance	Soil SSR Exceedance	Soil Metals Exceedance	GW Organics Exceedance	GW Inorganics Exceedance	Last Contamination Status Update
Current	Current	Current	Current	Current	02/04/2026

5.14 Asset – Update Remediation & Monitoring Status

1. From the Open Assets table grid, click the 'R&M Status Update' button for the specific Asset
2. Visually verify the current Remediation & Monitoring status in the 'Asset Information' section.
3. Select the Remediation & Monitoring Category, Status, and Status Change Date
4. After Submit, verify both the 'Asset Information' and 'Remediation Status Log' sections update accurately
5. Repeat the update for all Categories that have changed
6. Once complete, navigate to the 'Open Assets' page and verify the status and effective date have updated accurately.

Soil Excavation Status	Active
Soil Remediation Status	Active
GW Monitoring Status	Active
GW Remediation Status	Active

Remediation Status Logs

Not editable. Delete and add new if needed.

Export Filter

Remediation Category	Remediation & Monitoring Status	Status Date
Soil Remediation	Active	02/04/2026
Soil Excavation	Active	02/04/2026
GW Remediation	Active	02/04/2026
GW Monitoring	Active	02/04/2026

Soil Excavation	Soil Remediation	GW Monitoring	GW Remediation	Last R&M Status Update
Active	Active	Active	Active	02/04/2026

5.15 Asset – Reassign Asset to New REM

1. From the Open Assets table grid, scroll right and click the 'Reassign to New REM' button for the specific Asset
2. Visually verify the current REM in the 'Asset Information' section.

3. Enter Previous (Current) REM and the End Date which the Asset is assigned to that REM
4. Enter New/Target REM
5. Select New/Target REM (a duplicate) and the Start Date when the Asset is assigned to that REM
6. Enter Comment as appropriate
7. Do Not edit the Asset Connection data field
8. After Submit, verify the following update accurately
    a. This page's 'Asset REM History'
    b. This page's 'Asset Information'
9. Navigate to the Open Assets page and verify the Asset is properly assigned to the new REM
10. Navigate to the 'Open REMs Workflow' page and verify the Asset is listed under the new REM and no longer listed under the previous

Chevron

CO AR
REM Tracking

F27 Workflow

(Quarterly, Semi Annual, Annual)

1. Peparations

a. Familiarity w/REM T Categories & Status
b. Familiarity w/F27 contents
c. Assemble Attachments (PDF, minimized)
d. F27 created in WebForms

- Understand the Assets this F27 reports.
- Familiarity with Contamination and R&M Statuses.
- What work was performed, or is being reported first or following F27 Denial?
- Know work performed, when, where, and the results.
- Know work the F27 proposes?
- Are there outstanding COAs?
- Other F27 proposals: REM consolidation; RSSLs; Offsite background; Closure;

2. If spill F19 approved

e. Add Spill Asset to REM Tracker

3. Create F27

f. F27#/Submit date via Web forms

4. Add Attachments

g. Upload Attachments to REM Tracker →
h. Associate Assets with Attachments

- Both performed and proposed work
- Select Attachment Type
- Include Lab Report ID s.

5. Add Work Activities

I. Add F27 Work Performed/Reported →
j. Add F27 Work Proposed →
Add 90-Day / 180-Day Planned Work

- **Associate Attachments to Work**
- **Associate Assets to Work**

6. Update Contamination Status

Did contamination status change based on sampling? → k. Update Asset Contamination Status

- Soil Organics > 915
- Soil Metals > 915
- Soil SSR > 915
- GW Organics > 915
- GW Inorganics > 915

7. Update Remediation & Monitoring Status

Did Remediation & Monitoring activities or plans change? → l. Update Remediation & Monitoring Status

- Soil Excavation
- Soil Remediation
- GW Monitoring
- GW Remediation

8. Other Updates

m. Update REM and Asset Table Grids as needed

- Asset Report / Work Sharing with another REM
- Changes to Hold Delays
- Changes to REM's Special Categories
- Changes to Reporting Consultant, Asset BP

3/1/2026

Decommissioning & Weekly Workflows

(Decommissioning, Weekly, As Needed)

Decommissioning

1. Initial F27 Documents

1. Add Docs to REM Tracker:
   F27-I, Maps, F27-S
2. Add Assets From F27-I to REM T
   via Initial Action Summary

2. Update Asset with Decom Results

FLR colllected, Had Reportable

3. Update Asset Contamination Status

- Soil Organics > 915
- Soil Metals > 915
- Soil SSR > 915
- GW Organics > 915
- GW Inorganics >

4. Update Asset Remediation & Monitoring Status

- Soil Excavation
- Soil Remediation
- GW Monitoring
- GW Remediation

5. Update Asset Closure Status

Weekly / ECMC F27 Review

1. Upload reviewed F27-S to REM T

2. Add COAs / Comments to REM T

3. If F27 requested closure

Update REM Closure Status

4. If F27 requested REM consolidation

a. Transfer asset(s) to new REM using
   Asset REM Assignment (form)
b. Update REM Closure Status

Other REM T Updates

1. Lab Report results

Update Decommisioning Results:
Had Reportable, Reportable via

2. Spill F19s approved

Add Spill Asset to REM Tracker

3. Changes to:

- Hold Delays
- REM's Special Categories
- Reporting Consultant, Asset BP
